#### PART - F

Please specify the characterization (in terms of composition and quantum) of hazardous as well as solid wastes and indicate disposal practice adopted for both the categories of wastes:

#### **Hazardous Wastes:**

Cement manufacturing is based on "Dry Process". No Hazardous waste is generated from the process except used oil which is drained from machineries /equipments. Used oil is sold to the CPCB authorized recyclers/self used for lubrication.

#### **Battery Waste:**

As specified under Batteries (Management & Handling) Amendment Rules, 2010, we have purchased following new batteries of different categories.

#### Year 2017-18

Number of new batteries of different categories purchased from the manufacturer / importer / dealer or any other agency.	During 1 <sup>st</sup> April, 2017 to 31st March, 2018

#### **Bio-Medical Waste:**

Bio-Medical Waste generated during current financial year April, 2017 to March, 2018 under the Bio-Medical Waste (Management & Handling) Rules, 2016, are as follows.

#### Year 2017-18

	Bio-	Medical Waste Quar	ntity (Kg) as per color	ir coding
April,17 to	Red (Cat 3&6)	Blue (Cat 4&7)	Yellow (Cat 1&2)	Black (Cat 5, 9 &10)
March, 18	-	0.770 kg	1.576 kg	72

#### E- Wastes:

Above generated E- Waste has been sent to authorize recycler.

Solid Wastes: - N.A.

#### PART - G

# IMPACT OF THE POLLUTION CONTROL MEASURES ON CONSERVATION OF NATURAL RESOURCES AND CONSEQUENTLY ON THE COST OF PRODUCTION

Clinker grinding unit is being operated on dry process technology, which is cost effective and environmentally clean technology. The advantage of roller press for pre grinding of clinker is an energy conservation process. The stack emissions from the plant are controlled by equipment like bag houses and bag filters installed at various material transfer points to clean the process and arrest the fugitive emissions. The particulate matter collected in the pollution control equipment is recycled/reused in process and neutralizing the cost of operation of pollution control equipments and hence no cost impact on the production cost.

#### PART - H

## ADDITIONAL MEASURES / INVESTMENTS PROPOSAL FOR ENVIRONMENT PROTECTION INCLUDING ABATEMENT OF POLLUTION

Green belt development and tree plantation is our ongoing process. Every year we are doing new tree plantation to increase the bio-diversity of the area. Upto 31 March, 2018, we have planted around 10,938 tree and this is around 34 % green area of the total plant area.

#### PART - I

ANY OTHER PARTICULARS FOR IMPROVING THE QUALITY OF ENVIRONMENT.

 We have full-fledged Environment Department with three separate cells, one for monitoring, one for maintenance of pollution control equipment and one for green belt development.

2. Monitoring of stack emission, ambient air quality & ambient noise and ground water

quality & level is being monitored regularly.

3. Maintenance department is doing regular checking and scheduled maintenance of all the pollution control devices i.e. bag filters.

4. Civil and Personal & Administration departments taking care for of House keeping.

5. To reduce fugitive emission, we have procured a big size truck mounted TPS sweeping machine for regular & frequent sweeping and cleaning of paved area.

6. Horticulture section is taking care of tree plantation and green belt development. Every year we are growing new tree plantation.

- We have Installed Continuous Emission Monitoring System (CEMS) to display the data on CPCB/RPCB web sites.
- 8. Domestic waste water is being treated at Sewage Treatment Plant (STP). This treated water is being utilized in plantation & gardening.

On support of above, we are enclosing herewith following Annexure:-

Annexure-I : Ambient Air Quality Monitoring Report for the year 2017-18

Annexure-II : Stack Emission Level Monitoring Report for the year 2017-18
