SHREE CEMENT LTD.

Regd. Office:

BANGUR NAGAR, POST BOX NO.33, BEAWAR 305 901, RAJASTHAN, INDIA

SCL/ENV/Shyamgarh Mines/2019-20/

Date:-18/11/2019

To,
The Director,
Ministry of Environment & Forest,
Regional office (Central Region),
Kendriya Bhawan, 5th Floor Sector 'H' Aliganj,
Lucknow (U.P.), Pin-226024.

Sub:- Amendment in Environmental clearance w.r.t. mention the crusher (800 TPH) & ML No. (08/99) in EC granted for Limestone production capacity at 2.0 Million TPA (ML area – 448.5 ha., ML No. 08/99) located near Village Shyamgarh- Neemgarh, Tehsil: Masuda District Ajmer (Rajasthan) by M/s Shree Cement Ltd (Proposal No.: 1A/RJ/MIN/106777/2019; - Reg:- Amendment In EC

Ref:- 1. Environment Clearance Letter No. J-11011/195/2009-IA-II(I) dated 04/11/2010.
2. Environment Clearance Letter No. J-11011/195/2009-IA-II(I) – Amendment in EC dated 14/10/2019

Dear Sir,

With reference to above subject matter and referred letters. We would like to submit EC Compliance report for Apr 19 – Sept 19.

Thanking you,

Yours faithfully,

For SHREE CEMENT LTD.

(Dr. Anil Kumar Trivedi)
Sr. G.M. (Environment)

Cc to:- 1. The Director (IA Div.-Thermal Power), Ministry of Environment & Forests
Indira Paryavaran Bhavan, Jorbag Road, New Delhi-110003
2. The In-Charge (Zonal Office), Central Pollution Control Board (CPCB), 3rd
Floor, Sahkar Bhawan, North T.T. Nagar, Bhopal-462003(M.P.)
3. The Member Secretary, Rajasthan Pollution Control Board, 4, Institutional
Area, Jhalana Doongri, JAIPUR-302004(Rajasthan).

COMPLIANCE OF CONDITIONS OF ENVIRONMENT CLEARANCE LETTER NO.-J-11011/195/2009-IA II(1) dated 14/10/2019 OF SHYAMGARH LIMESTONE MINES OF M/S. SHREE CEMENT LIMITED, BEAWAR-AJMER(RAJASTHAN) Reg. Amendment in EC

| S. NO. | Conditions | Compliance Status |
|----------------------------|--|---|
| Standard Conditions | | |
| I | Statuary Complainece | |
| 1 | This Environment Clearance (EC) is subject to Orders/ judgement of Hon'ble Supreme court of India, Hon'ble High Court, Hon'ble NGT and any other Court of Law, Common Cause Cnditions as may be applicable. | Noted. |
| 2 | The Project Proponent complies with all the statuary requirements and judgement of Hon'ble Supreme court dated 2 nd Aug 17 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India and Ors before commencing the mining operations. | Project Proponent complies with all the statuary requirements and judgement of Hon'ble Supreme court dated 2 nd Aug 17 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India and Ors before commencing the mining operations. |
| 3 | The state government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective department of Mining and Geology in strict complainecejudgement of Hon'ble Supreme court dated 2 nd August, 2017 in writ petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Others. | Its Goverment's jurisdiction. |
| 4 | This Environmental Clearance shall become operational only after receiving formal NBWL clearance from MoEF& CC subsequent to the recommendations of the standing committee of National Board for Wildlife, if applicable to the project. | Noted. |

| | | |
|---|--|--|
| 5 | This Environmental clearance shall become operational only after receiving formal Forest Clearance (FC) under the provision of Forest Conservation Act, 1980, if applicable to the Project. | Noted |
| 6 | Project Proponent (PP) shall obtain Consent to Operate after grant of EC and effectively implement all the conditions stipulated therein. The mining activity shall not commence prior to obtaining Consent to Establish/ Consent to Operate from the concerned state Pollution Control Board/ Committee. | Consent to Operate has been obtained by Board vide Board's file no: F(Mines)/Ajmer (Masuda)/1174(1)/2019-2020/226-230 dated 22.04.2019. |
| 7 | The PP shall adhere to the provision of the Mines Act, 1952, Mines and Mineral (Development and Regulation), Act, 2015 and rules and regulations made there under. PP shall adhere to various circulars issued by Directorate General Mines Safety (DGMS) and Indian Bureau of Mines from time to time. | Noted, PP shall adhere to the provision of the Mines Act, 1952, Mines and Mineral (Development and Regulation), Act, 2015 and rules and regulations made there under. PP shall adhere to various circulars issued by Directorate General Mines Safety (DGMS) and Indian Bureau of Mines from time to time. |
| 8 | The project proponent shall obtain consents from all the concerned land owners, before start of mining operations, as per the provisions of MMDR act, 1957 and rules made there under in respect of lands which are not owned by it. | Noted, all consents shall be taken. |
| 9 | The project proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA. II (M), dated 29.10.2014, titled " Impact of mining activities on Habitations- Issues related to the mining projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area". | Noted. |

| | | |
|----|---|---|
| 10 | The project proponent shall obtain necessary prior permission of the competent authorities for drawl of requisite quantity of surface water and from CGWA for withdrawal of ground water for the project. | Noted, necessary prior permission of the competent authorities for drawl of requisite quantity of surface water and from CGWA for withdrawal of ground water for the project shall be obtained. |
| 11 | A copy of EC letter will be marked to concerned panchayat/ Local NGO etc. If any, from whom suggestion/ representation has been received while processing the proposal. | Copy of EC letter has been sent to concerned panchayat. (attached as annexure 1) |
| 12 | State Pollution control board/ Committee shall be responsible for display of this EC letter at its Regional office, District Industries Center and Collector's office/ Tehsildar's Office for 30 days. | Board's jurisdiction. |
| 13 | The project authorities should widely advertise about the grant of this EC letter by printing the same in atleast 2 local newspapers, one of which shall be in vernacular language of the concerned area. The advertisement shall be done in 7 days of the issue of the clearance letter mentioning that the instant project has been accorded EC and copy of the EC letter is available with the State Pollution Control Board/ Committee and web site of the Ministry of Environment, Forest and Climate Change (www.parivesh.nic.in). A copy of the advertisement may be forwarded to the concerned MoEF& CC regional office for compliance and record. | Published on 22/10/2019. Copies of advertisement have been forwarded to the Regional office of MoEF&CC vide letter no SCL/ENV/Shyamgarh Mine/ 2019-20 dated 24.10.2019. |
| 14 | The Project Proponent shall inform the MoEF& CC for any change in ownership of the mining lease. In case there is any change in ownership or mining lease is transferred than mining operation shall only be carried out after transfer of EC as per provisions of para 11 of EIA | Noted, Shall be complied. |

| | | |
|----|--|---|
| | notification, 2006 as amended from time to time. | |
| II | Air Quality Monitoring and Preservation | |
| 15 | <p>The project proponent shall install a minimum of 3 (three) online Ambient Air Quality Monitoring Stations with 1 (one) in upwind and 2 (two) in downwind direction based on long term climatological data about wind direction such that an angle of 120 deg is made between the monitoring locations to monitor critical parameters, relevent for mining operation, of air pollution viz. PM 10, PM 2.5, NO2, CO and SO2 etc. As per the methedology mentioned in NAAQS notification No. B-29016/20/90/PCI/I, dated 18.11.2009 covering the aspects of transportation and use of heavy machinery in the impact zone. The ambient air quality shall also be monitored at prominent places like office building, canteen etc. As per the site condition to ascertain the exposure characterstics at specific places. The above data shall be digitally displayed within 3 months in front of the main gate of the mine site.</p> | <p>We are in process of procurement of 3 Nos of AAQMS stations. Also, ambient air quality shall also be monitored at prominent places like office building, canteen etc.</p> <p>Manual Monitoring at nearby villages is being conducted regularly (attached as annexure 2)</p> |
| 16 | <p>Effective safegaurd measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM 10 and PM 2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water- soluble chemical dust suppressing</p> | <p>Noted, Safegaurd measures like regular water sprinkling, metalled road construction etc. shall be carried out in areas prone to air pollution.</p> |

| | | |
|------------|---|---|
| | agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level confirm to the standards prescribed by MoEF&CC/ Central Pollution Control Board. | |
| III | Water quality monitoring and preservation | |
| 1 | In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area. | Noted, Ground water table is not being intersected. |
| 2 | Regular monitoring of the flow rate of the springs and perennial nallahs flowing in and around the mine lease shall be carried out and records maintained. The natural water bodies and or streams which are flowing in and around the village, should not be disturbed. The water table should be nurtured so as not to go down the pre mining period. In case of any water scarcity in the area, the Project Proponent has to provide water to the villagers for their use. A provision for regular monitoring of water table in open dug well located in village should be incorporated to ascertain the impact of mining over ground water table. The report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional office of the ministry, CGWA and State Ground water Department/ State | Noted, Shall be complied. |

| | | |
|---|--|--|
| | Pollution Control Board. | |
| 3 | <p>Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezometer installations during the mining operation in consultation with CGWA/ SGWD. The report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional office of the ministry, CGWA and State Ground water Department/ State Pollution Control Board.</p> | <p>Noted, Ground water level and quality records shall be regularly monitored by establishing a network of existing wells as well as new piezometer installations during the mining operation. six-monthly basis to the Regional office of the ministry, CGWA and State Ground water Department/ State Pollution Control Board shall be submitted.</p> |
| 4 | <p>The project proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease and maintain its records. The project proponent shall undertake regular monitoring of water quality upstream and downstream of water bodies passing within and nearby / adjacent to mine lease and maintain its record. Suffivient number of gullies shall be provided at appropriate places within the lease for the management of water. PP shall carryout regular monitoring w.r.t pH and included the same in monitoring plan. The parameters to be monitored shall include their water quality vis-a-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and /or alteration be made to water bodies during mining operations without justification and prior approval of MoEF&CC. The monitoring of water courses/ bodies existing in lease area shall be carried out 4 times in a year viz. Pre-monsoon (April- May), monsoon (August), Post- monsoon (November) and Winter</p> | <p>Noted, shall be complied.</p> |

| | | |
|---|--|--|
| | (January) and record of monitored data may be sent regularly to MoEF&CC and its regional Office, CGWA & Regional Director, CGWB, SPCB and CPCB. Clearly showing the trend analysis on six monthly basis. | |
| 5 | Quality of polluted water generated from mining operations which include Chemical Oxygen Demand (COD) in mines run –off; acid mine drainage and metal contamination in runoff shall be monitored along with Total Suspended Solids (TDS), Dissolved Oxygen (DO), 'pH and Total Suspended Solids (TSS). The monitored data shall be uploaded on the website of the company as well as displayed at the project site in public domain, on a display board, at a suitable location near the main gate of the company. The circular No. J-20012/1/2006 – IA.II (M) dated 27.05.2009 issued by MoEF&CC may also be referred in this regard. | Noted, shall be complied. |
| 6 | Project Proponent shall plan, develop and implement rainwater harvesting measures on long term basis to augment ground water resources in the area in consultation with CGWB/SGWD. A report on amount of water recharges needs to be submitted to Regional Office MoEF&CC annually. | Rain water collected from the roof top will be injected into the ground through injection wells to recharge the ground water table. Report on amount of water recharges shall be submitted to Regional Office MoEF&CC annually |
| 7 | Industrial waste water (workshop and waste water from the mine) should be properly collected and treated so as to conform to the notified standards prescribed from time to time. The standards shall be prescribed through Consent to Operate (CTO) issued by concerned SPCB. The workshop effluent shall be treated after its initial passage through Oil and Grease teap. | There will be no industrial waste water generated. |

| | | |
|----|--|---------------------------|
| 8 | The water balance/ water auditing shall be carried out and measures for reducing the consumption of water shall be taken up and reported to the Regional Office of the MoEF&CC and SPSB/ Committee. | Noted, shall be complied. |
| IV | Noise and Vibration moinitoring and prevention | |
| 9 | The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines. | Noted, shall be complied. |
| 10 | The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages and keeping the noise levels well within the prescribed limits for day/night hours. | Noted, shall be complied. |
| 11 | The Project proponent shall take measures for control of noise levels below 85 'dBA in the work environment. The workers engaged in operations of HEMM, etc. Should be provided with ear plug/ muffs. All personal including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment. | Noted, shall be complied. |
| V | Mining Plan | |

| | | |
|----|---|---------------------------|
| 12 | <p>The Project proponent shall adhere to the working parameters of mining plan which was submitted at the time of EC appraisal wherein year-wise plan was mentioned for total excavation i.e. quantum of mineral, waste, over burden, inter burden and top soil etc. No change in basic mining proposal, lease area and scope of working (Viz. Method of mining, overburden and dump management, OB and dump mining, mineral transportation mode, ultimate depth of mining etc.) shall not be carried out without prior approval of the MoEF&CC, which entail adverse environmental impacts, even if it is a part of approved mining plan modified after grant of EC or Granted by State Govt. In the form to Short Term Permit (STP), Query license or any other name.</p> | Noted, shall be complied. |
| 13 | <p>The project proponent shall get the final Mine Closure along with Financial Assurance approved from Indian Bureau of Mines/ Department of Mining and Geology as required under the Provision of the MMDR Act, 1957 and Rules/ Guidelines made there under. A copy of approved final mine closure plan shall be submitted within 2 months of the approval of the same from the competent authority to the concerned Regional Office of the MoEF&CC for record and verification.</p> | Noted, shall be complied. |
| 14 | <p>The land –use of mine lease area at various stages of mining scheme as well as at the end of life shall be governed as per the approved mining plan. The excavation vis-a-vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the monitoring and management of rehabilitated areas until</p> | Noted, shall be complied. |

| | | |
|----|---|---|
| | the vegetation becomes self-sustaining. The compliance status shall be submitted half yearly to the MoEF&CC and its concerned Regional Office. | |
| VI | Land Reclamation | |
| 15 | The Overburden (O.B.) generated during the mining operations shall be stacked at earmarked OB dump site(s) only and it should not be kept active for a long period of time. The physical parameters of the OB dumps like height, width and angle of slope shall be governed as per the approved Mining Plan as per the guidelines/ Circulars issued by D.G.M.S w.r.t. safety in mining operations shall be strictly adhered to maintain the stability of top soil/ OB dumps. The topsoil shall be used for land reclamation and plantation. | Noted, Overburden (O.B.) generated during the mining operations is being stacked at earmarked OB dump site only. The physical parameters of the OB dumps like height, width and angle of slope are being governed as per the approved Mining Plan as per the guidelines/ Circulars issued by D.G.M.S w.r.t. safety in mining operations is being strictly adhered to maintain the stability of top soil/ OB dumps. There is no top soil and the limestone is exposed on surface. |
| 16 | The reject/ waste generated during the mining operations shall be stacked at earmarked waste dump site(s) only. The physical parameters of the waste dumps like height, width and angle of slope shall be governed as per the approved mining plan as per the guidelines/ circulars issued by DGMS w.r.t. safety in mining operations shall be strictly adhered to maintain the stability of waste dumps. | Action plan for the mining, management of overburden (removal, storage, disposal etc.) reclamation of mined out area has been submitted and mine closure plan will be submitted to the Ministry and its Regional Office at Lucknow. |
| 17 | The reclamation of waste dump sites shall be done in scientific manner as per the Approved mining plan cum progressive Mine closure plan. | Noted, of waste dump sites shall be done in scientific manner as per the Approved mining plan cum progressive Mine closure plan. |
| 18 | The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local | Noted, slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability prevent erosion and |

| | | |
|-----|--|--|
| | <p>climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/compactors thereby ensuring proper filling/leveling of dump mass. In critical areas, use of geo textiles/geo-membranes/clay liners/Bentonite etc. shall be undertaken for stabilization of the dump.</p> | <p>surface run off.</p> |
| 19. | <p>The project proponent shall carry out slope stability study in case the dump height is more than 30 meters. The slope stability report shall be submitted to concerned regional office of MoEF&CC.</p> | <p>Noted, shall be complied.</p> |
| 20. | <p>Catch drains, setting tanks and siltation ponds of appropriate size shall be constructed around the mine working, mineral yards and top Soil/OB/Waste dumps to prevent run off of water and flow of sediments directly into the water bodies (Nallah/River/Pond etc.) The collected water should be utilized for watering the mine area, roads, green belt development, plantation etc. The drains/sedimentation sumps etc. shall be de-silted regularly, particularly after monsoon season, and maintained properly.</p> | <p>Catch drains and siltation ponds have been constructed. The mining activity has been started recently and in future rain water collected in mine pit will be utilized for plantation, road spray and process.</p> |
| 21. | <p>Check dams of appropriate size, gradient and length shall be constructed around mine pit an OB dump to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structure over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention</p> | <p>Noted, Check dams of appropriate size, gradient and length shall be constructed around mine pit an OB dump to prevent storm run-off and sediment flow into adjoining water bodies</p> |

| | | |
|-----|---|--|
| | time period thereby allowing proper setting of sediments/silt material. The sedimentation pits/sumps shall be constructed at the corners of the garland drains. | |
| 22. | The top soil, if any, shall temporarily be stored earmarked site (s) within the mine lease only and should not be kept unutilized for long. The physical parameters of the top soil dumps like height, width and angle of slope shall be governed as per the approved mining plan and as per the guidelines framed by DGMS w.r.t safety in mining operations shall be strictly adhered to maintain the stability of dumps. The topsoil shall be used for land reclamation and plantation purpose. | There is no Top soil. Limestone is exposed on surface. |
| 23. | No transportation of the minerals shall be allowed in case of roads passing through villages/habitations. In such cases, PP shall construct a 'bypass' road for the purpose of transportation of the minerals leaving and adequate gap (say at least 200 meters) so that adverse impact of sound and dust along chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. | Noted, No transportation of the minerals shall be done roads passing through villages/habitations elase bypass road shall be constructed.. Vehicular emission shall be kept under control and regularly monitored |

| | | |
|-----|---|--|
| | Vehicular emission shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. | |
| 24 | <p>The main haulage road within the mine lease should be provided with a permanent water sprinkling arrangement for dust suppression. Other roads within the mine lease should be wetted regularly with tanker-mounted water sprinkling system. The other areas of dust generation like crushing zone, material transfer points, material yard etc. should invariably be provided with dust suppression arrangements. The air pollution control equipment's like bag filters, vacuum suction hoods, dry fogging system etc. shall be installed at Crushers, belt conveyors and other areas prone to air pollution. The belt conveyor should be fully covered to avoid generation of dust while transportation. PP shall take necessary measures to avoid generation of fugitive dust emissions.</p> | <p>Noted, Regular water sprinkling is being done on haul roads, permanent water sprinkling arrangement for dust suppression shall be installed on main haulage road.</p> <p>Water sprinklers/ sprayers and Bag filters have been installed at various points such as crushing zone, material transfer points, material yard etc.</p> |
| 25. | <p>The project proponent shall develop greenbelt in 7.5 wide safety zone all along the mine lease boundary as per the guideline of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area. The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.</p> | <p>Noted, Greenbelt of width 7.5 meter shall be developed all along the mine lease boundary as per the guideline of CPCB in order to arrest pollution emanating from mining operations within the lease.</p> <p>1200 Nos of trees have been planted near dumping site near mine boundary till date.</p> |
| 26. | <p>The project proponent shall carryout plantation/afforestation in backfilled and reclaimed area of mining lease, around</p> | <p>Noted, Shall be complied.</p> |

| | | |
|-----|---|---|
| | <p>water body, along the roadsides, in community area etc. by planting the native species in consultation with the State Forest Department/Agriculture Department/Rural development department/Tribal welfare Department/Gram panchayat such that only those species be selected which are of use to the local people. The CPCB guidelines in this respect shall be also be adhered. The density of the trees should be around 2500 saplings per hectare. Adequate budgetary provision shall be made for protection and care of trees.</p> | |
| 27. | <p>The project proponent shall make necessary alternative arrangement for livestock feed by developing grazing land with a view to compensate those areas which are coming within the mine lease. The development of such grazing land shall be done in consultation with the State Government. In this regard, Project proponent should essentially implement the directions of the Hon'ble Supreme Court with regard to acquisition of grazing land. The sparse trees on such grazing ground, which provide mid-day shelter from the scorching sun, should be scrupulously guarded/protected against felling and plantation of such trees should be promoted.</p> | Noted. |
| 28. | <p>The Project proponent shall undertake all precautionary measures for conservation and protection of endangered flora and fauna and Schedule-1 species during mining operation. A Wildlife conservation plan shall be prepared for the same clearly delineating action to be taken for conservation of flora and fauna. The shall be approved be Chief Wild Life Warden of</p> | Noted, However there are no endangered flora and fauna and Schedule-1 species in ML area. |

| | | |
|-----|--|---|
| | the State Govt. | |
| 29. | And implemented in consultation with the State forest and wildlife department. A copy of wildlife conservation plan and its implementation status (annual) shall be submitted to the Regional office of the ministry. | There are no endangered flora and fauna and Schedule-1 species in ML area |
| 30. | The project proponent shall appoint an Occupational health specialist for regular as wells as periodical medical examination of the workers engaged in the mining activities, as per the DGMS guidelines. The records shall be maintained properly. PP shall also carryout occupational health check-ups in respect of workers which are having ailments like BP, diabetes, habitual smoking, etc. The check –ups shall be undertaken once in six months and necessary remedial/preventive measures be taken. A status report on the same may be sent to MoEF&CC Regional office and DGMS on half-yearly basis. | Complying with, Occupational health programmes are being organized on a regular basis and records are maintained. The programme is organized once in six months. PPEs are being provided. |
| 31. | The project proponent must demonstrate commitment to work towards 'Zero harm' from their mining activities and carry out Health Risk Assessment (HRA) for identification workplace hazards and assess their potential risks to health and determine appropriate control measures to protect the health and wellbeing of workers and nearby community . The proponent shall maintain accurate and systematic records of the HRA. The HRA for neighborhood has to focus on Public Health problems like Malaria, Tuberculosis, HIV, Anemia, Diarrhea in children under five, respiratory infections due to bio mass cooking. The proponent shall also create awareness and educate the nearby community and workers for | Noted, shall be complied. |

| | | |
|----|---|---|
| | <p>sanitation, personal hygiene, hand washing, not to defecate in open, Women Health and Hygiene (providing Sanitary Napkins) hazard of tobacco and alcohol use. The proponent shall carryout base line HRA for all the category of workers and thereafter every five years.</p> | |
| 32 | <p>The proponent shall carry out occupational health surveillance which be a part of HRA and include Biological Monitoring where practical and feasible, and the tests and investigations relevant to the exposure e.g for Dust a X-Ray chest; for noise audiometric ; for lead exposure blood lead, for welders full ophthalmologic assessment; for Manganese miners a complete neurological assessment by a certified neurologist, and Manganese (Mn) estimation in blood; for inorganic chromium-fortnightly skin inspection of hands and forearms by a responsible person. Except routine tests all tests would be carried in a Lab accredited by NABH, records of health surveillance must be kept for 30 years, including the results of and the records Physical examination and tests. The record of exposure due to materials like asbestos, hard rock mining silica, gold, kaolin, aluminum, iron, manganese, chromium, lead, uranium need to be handed over to the Mining department of the State in case the life of the mine is less than 30 years. It would be obligatory for the states mines departments to make arrangements for the safe and secure storage of the records including X-Ray. Only conventional X-Ray will be accepted for record purpose and not the digital one. X-Ray must meet ILO criteria (17 x 14 inches and of good quality).</p> | <p>Noted, shall be complied, in addition to existing Occupational health programmes which are being organized on a regular basis.</p> |

| | | |
|----|---|---|
| 33 | <p>The proponent shall maintained a record of performance indicators for workers which included (a) there should not be a significant decline in their body mass index and it should stay between 18.5-24.9, (b) the final chest X-ray compared with the base line X-Ray should not show any capacities, (c) at the end of their leaving job there should be no diminution in their lung functions forced expiratory volume in one second (FEV1), Forced vital capacity (FVC), and the ration) unless they are smokers which has to be adjusted, and the effect of age, (d) their hearing should not be affected. As a proof and audiogram (first and last need to be presented), (e) they should not have developed any persistent Back pain, neck pain, and the movement of their hip, knee and other joints should have normal range of movement, (f) they should not have suffered loss of any body part. The record of the same should be submitted to the regional office, MoEF&CC annually along with details of the relief and compensation paid to workers having above indications.</p> | <p>Noted, shall be complied.</p> |

हुए बताया कि कोई भी सरस उत्पाद मिलावटी या नकली मिलना है तो उस पर इनाम रखा है।

कार्यक्रम में अखिल राजस्थान उपभोक्ता संगठन महासंघ के महासचिव योगेश पालीवाल बीकानेर, अध्यक्ष मंडल सदस्य राम बहादुर कुलश्रेष्ठ कोटा, सागर सिंह राठीझर, सचिव कंचन भाटी बीकानेर, राधवेंद्र सिंह मसूदा, 'नरेंद्र सिंह पद्मावत खरवा, उपसचिव मंजू सेन मसूदा कार्यकारिणी सदस्य गंगापुर जिला से एचपी बैस्वा, लाहलकर जयपुर, नरसिंह व्यास बीकानेर संभाग प्रभारी राम कुमार व्यास, उदयपुर जिला अध्यक्ष शशांक शर्मा ने उपभोक्ताओं के साथ हाँ रहे शोषण पर विचार व्यक्त किए। वे उपभोक्ता आंदोलनकारियों के लिए महासंघ के स्तर पर एकजुटता से जागृति कार्यक्रम ह्राथ में लेकर जन जागृति अभियान चलाने व उपभोक्ता आंदोलनकारियों को आ रही परिस्थानियों पर सरकार का ध्यान आकर्षित करने, उन्हें सुविधाएं दिलवाने के लिए विचार व्यक्त किए। मानक जैन ने कार्यक्रम का संचालन किया।

छेती कार्य में महिलाओं की महत्वपूर्ण भूमिका होती है

प्रीतिगान, कृषि कार्य में महिलाओं को महत्वपूर्ण भूमिका रहती है उनके बिना खेती अधूरी है। यह बात ग्राम फतेहपुरा राज्य योजना के तहत एक दिवसीय महिला प्रशिक्षण शिविर को समाहित करते हुए कृषि सहायक अधिकारी रामरत्न खरवड़ कहा। सोमवार को आयोजित कार्यशाला में सहायक कृषि अधिकारी रामरत्न खरवड़ ने रबी की फसल की बुवाई के बारे में जानकारी दी। रबी की फसल में प्रमाणित बीज का उपयोग ले और उनको तकनीकी की तरह बुवाई की जाए। बुवाई से पहले भूमि को उपजाऊ भूमि तैयार करें ताकि पैदावार अच्छी मिल सके कार्यशाला में सेवानिवृत्त सहायक कृषि अधिकारी सुरेश सोनी ने बुवाई के पहले बीज में कीटनाशक सुझाव मिलाकर बुवाई करें का सुझाव दिया। उसके बाद कृषि प्रत्येक्षक नरेंद्र सिंह सैल रबी की फसल में उन्नत बीज काम लेवें की जानकारी दी। प्रशिक्षण में प्रश्नोत्तरी प्रतियोगिता में महिलाओं से सवाल जवाब का सही उत्तर देने पर माया जाट, गीता वैष्णव, विद्या देवी जाट को प्रस्कार दिया गया।

१ में तीन गिरफ्तार

ने 3 लोगों को लड़ाई झगड़ा कर शांतिभंग कर लिया। सिटी थाना पुलिस के अनुसार नौ गणपतिलाल, मनोज पुत्र रमकेशान और चं पुत्र रमजान हनुमान चौक पर आपस में लड़ रहे थे। थाना पुलिस ने तीनों को शांतिभंग कर लिया।
